SOFTWARE ENGINEER

Full-Stack Software Engineer skilled in **React**, **Next.js**, and **Node.js**, with experience delivering **AI-powered platforms**, scalable APIs, and modern component libraries. Strong at turning designs into **production-ready, responsive UIs** and integrating **REST & GraphQL APIs** to build efficient, user-focused applications.

TECHNICAL SKILLS

Frontend : JavaScript, TypeScript, React, Next.js, Angular, React Native, HTML, CSS, SCSS
Backend : Node.js, Express, MongoDB, Mongoose, Strapi
APIs : REST, GraphQL
UI & Styling : Tailwind CSS, Shadcn/ui, Material UI, PrimeNG
Tools & Workflow : Git, GitHub, GitLab, CI/CD, Docker

EXPERIENCE

Full Stack Engineer Oct 2024 – Present
Business Expert [[website](#)] *Hybrid*

- Designed and implemented an AI-driven dynamic UI generation system with **React**, **Next.js**, and reusable component libraries — **reduced manual UI wiring by 40%**, accelerating feature delivery.
- Integrated services from **.NET** and **Django** teams, ensuring robust API contracts and seamless data flow across the platform.
- Converted Figma designs into reusable, responsive, and accessible components, improving product consistency and reducing UI-related bugs.

Frontend Intern Jun 2023 – Jun 2024
Brightskies [[website](#)] *Remote*

- Developed production-ready frontend features with **Next.js**, **GraphQL**, **Material UI**, and **Strapi**, focusing on performance and scalability.
- Contributed within a **GitLab CI/CD** pipeline, automating builds and deployments to improve release reliability.
- Translated Figma and Zeplin designs into pixel-perfect components, increasing design-to-code accuracy and development speed.

PROJECTS

Slide Genius [[Live Demo](#)] Next.js, MongoDB, Tailwind, Shadcn

- Developed an AI-powered presentation builder with **slide generation**, **template marketplace**, and a drag-and-drop editor.
- Implemented a template publishing workflow with reusable components, enabling users to create, share, and scale presentations quickly.

Smarty [[Live Demo](#)] Next.js, MongoDB, Tailwind, Shadcn, Uploadthing

- Built an AI-powered Q&A platform where users upload PDFs and ask context-aware questions.
- Integrated authentication and cloud storage for secure and scalable document management.

Imaginizer [[Live Demo](#)] Next.js, MongoDB, Cloudinary

- Developed a web app for advanced image editing including AI enhancement, restoration, recoloring, and background replacement.
- Integrated **Cloudinary API** for storage and on-demand media transformations.

Connectr [[Live Demo](#)] Next.js, MongoDB, Cloudinary, Pusher

- Built a social media platform with posts, threaded comments, reactions, and real-time chat using **Pusher**.
- Implemented friend system and secure authentication for an interactive community experience.

EDUCATION

Cairo University
Bachelor of Law

Cairo, Egypt
Aug 2020 – July 2024

- Transitioned to software engineering through intensive self-study, real-world projects, and professional certifications.
